

Proceedings of the Symposium on Mechanics for Space Flight

CONTENTS

Preface	1
Self-Similar Solutions of Hydrodynamic Equations for Expanding Layer with Boundary Condition Specified by Differential Equation H. Murakami, M. Tanba & K. Niu	3
Numerical Simulations for Intense Light-Ion Beam Propagation in Channel under Influence of Plasma Inertia S. Kawata & K. Niu	9
Propagation of Light Ion Beam II- "Micro- and Macrostabilities of Rotating Ion Layer" T. Okada, H. Murakami & K. Niu	21
Oxyhydrogen Ignition and Flame Propagation under Cryogenic Temperatures K. Hayashi & T. Fujiwara	27
Generation of Orthogonal, Body-Fitted Grids Using Potential Flow Solution by the Panel Method M. Hayashi, A. Sakurai & M. Nagahata	33
Frequency Effect of Transonic Flow over an Oscillating Airfoil K. Ono	41
Computation of Two-Dimensional, Transonic, Chemically Reacting Nonequi- librium Flow in a Rocket Nozzle K. Nakahashi	51
Lift Generation due to Vortex Shedding K. Oshima & Y. Oshima	65
Interplanetary Mission Designs by Multiple Earth-Venus-Jupiter Swingbys H. Yokota & T. Tanabe	73
Optimization of Low Thrust Trajectories for Collinear Lagrange Point Mission H. Matsuo, Y. Matogawa, T. Nozue & T. Shimoda	87
Attitude Control Experiment of Sounding Rocket S-520-5 I. Nakatani	103
Exact Director-Simulation-Scheme for the Boltzmann Equation/Correlation of Molecular Velocities Subject to Renewal Processes K. Nanbu	109
Couette Flow in Continuum to Free Molecular Region K. Nanbu	123
Relaxation of Velocity Distribution of Electrons Cooled (Heated) by Rota- tional Excitation (De-excitation) of n_2 K. Koura	141
On the Interpolation Formula Based upon the Asymptotic Solution to the Kinetic Model Equation T. Soga	151
Rotational Temperature Measurements in Free Jet Expansions of N_2 Using Electron Beam Fluorescence Technique T. Soga, M. Takanishi & M. Yasuhara	159

Density Measurements of a Free Jet by Laser Differential Interferometer	
M. Nishida & A. Nakajima	169
Translational Nonequilibrium in a Rapid Expansion Flow from a High Temperature Source	
K. Teshima, T. Moriya & N. Takahashi	179
Recent Developments in the Investigations on the Gas-Surface Interactions	
T. Fujimoto, S. Yamamoto & S. Kato	187
Monte Carlo Simulation in Molecular Gas Dynamics	
K. Koura	191
Rarefaction Phenomena in Gas and Isotope Separation	
H. Mikami	199
Remarks on Thermal Properties of Rotating Superfluid Helium in a Gravitational Field	
K. Etori	211
Simulation of Brownian Motion Affected by Gaussian Force in Gravitational Field	
K. Etori, S. Haraguchi & H. Okushima	229
Visualization of Density Variation due to Vapor Condensation	
Y. Kobayashi, M. Kaneko & T. Matsumoto	241
Studies on Condensation Heat Transfer in Two-Phase Closed Thermosyphons	
M. Takuma, S. Maezawa & A. Tsuchida	247
Unstable Phenomena in a Two-Phase Closed Thermosyphon	
K. Negishi	257
The Cooling Unit for the Closed Box	
T. Yasunaga & H. Koizumi	265
Heat Transfer Rate of Looped Type Heat Pipes Using Water and NAK as Working Fluid under Liquid Phase Flow	
Y. Tanaka, T. Yamamoto & H. Hattori	273
Symposium on Mechanics for Space Flight 1970–1980	
K. Oshima	283
