デブリ衝突損傷リスク解析ツール(TURANDOT)は、2008年に開発を開始した宇宙機設計支援ソフトウェアである。本ツールは宇宙機表面を詳細な格子に分割し、衛星各部の遮蔽効果を考慮した上で、各部のデブリ衝突による損傷発生確率を推定する。軌道上デブリフラックスのデータベースとしては、当初、MASTER2005とORDEM2000を利用したが、現在ではMASTER2009も利用可能のように機能拡張を実施した。本ツールの概要を報告する。

Development of Tactical Utilities for Rapid Analysis of Debris on Orbit Terrestrial (TURANDOT) is started on 2008. The software is capable of prediction of spacecraft damage probability by collisional debris including shielding effect of the spacecraft itself. The tool initially makes use of MASTER-2005 and ORDEM2000 as database of debris flux. We conducted the expansion so that the tool can reference MASTER-2009 also. The report is of the schematic of the tool.

## Contents

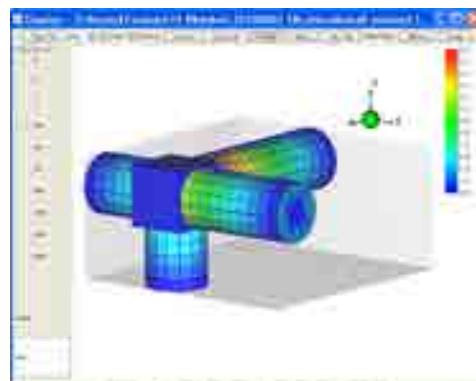

- What is TURANDOT ?
- History
- Functions
  - Own GUI
  - Database Inclusion
  - Damage Probability
- Analytical Technic
- Validation
- Conclusion

DB\_12\_01\_23\_MUSE

2

# What is TURANDOT ?

- JAXA's Debris collision risk analysis tool
  - For each part of spacecraft system
  - Orbit, Attitude, Shape & Shielding Effect
  - Users' defined Damage Mode & Ballistic Limit Eq.

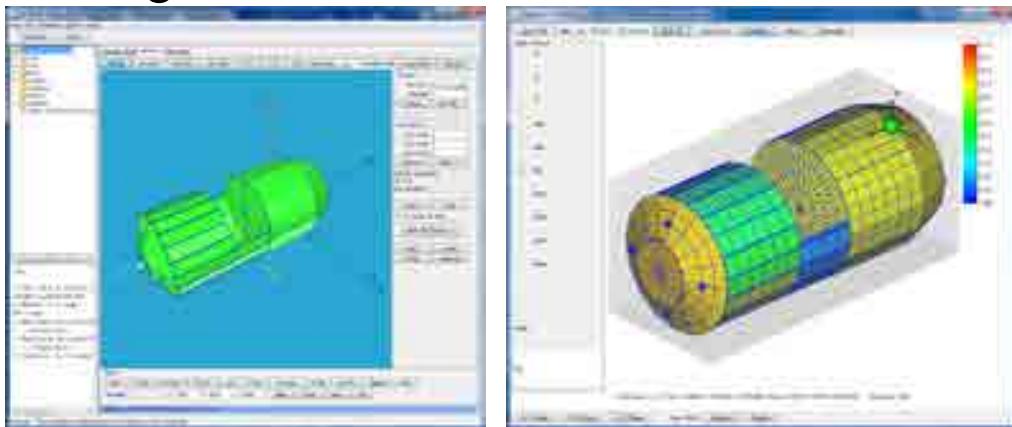

3

# History

- April, 2007~Feb., 2009
  - “Collision Probability” Analysis Tool
- April, 2009~Feb., 2011
  - “Collisional Damage” Probability Analysis Tool
- April, 2011~Feb., 2012
  - Including “MASTER-2009”

# Functions I

- GUI
  - Integrated Analysis Environment
  - Satellite modeling
  - Grid generation

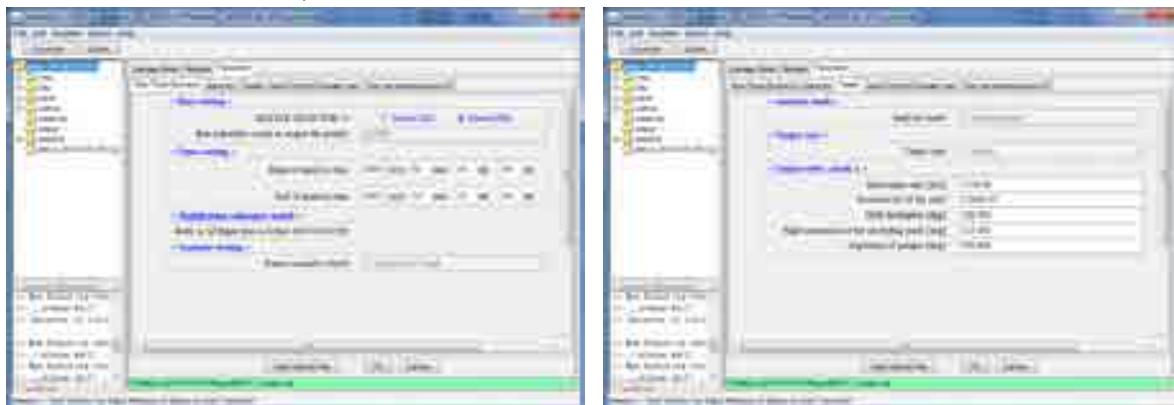

DB\_12\_01\_23\_MUSE

5

# Functions I

- GUI
  - Computation condition setting
  - Requirement from Databases (MASTER & ORDEM)

DB\_12\_01\_23\_MUSE

6

## Functions II

- No Domestic Database!
  - MASTER-2005 & ORDEM2000
  - MASTER-2009 & ORDEM2000

$$\text{flux}_{\text{ORDEM}} = \text{flux}_{\text{MASTER}} \cdot K \quad \text{if } 1 < K$$

$$\text{flux}_{\text{ORDEM}} = \text{flux}_{\text{MASTER}} \quad \text{if } K < 1$$

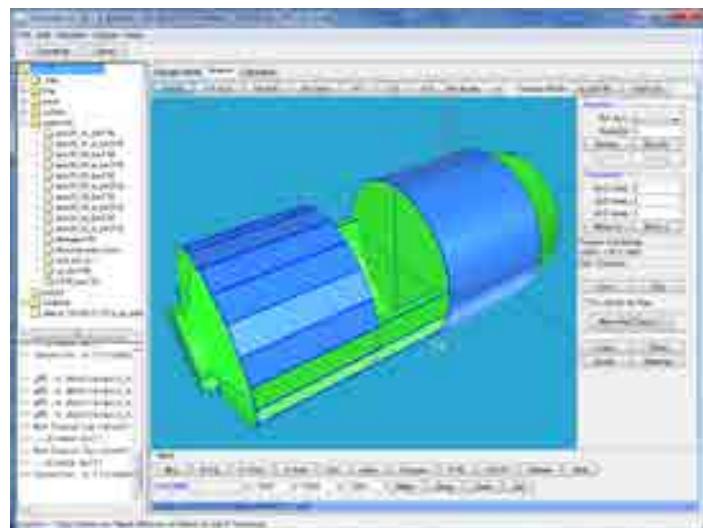

$$K = \frac{F_{\text{ORDEM}}}{\int f_{\text{MASTER}} \cdot d\Omega}$$

DB\_12\_01\_23\_MUSE

7

## Functions III

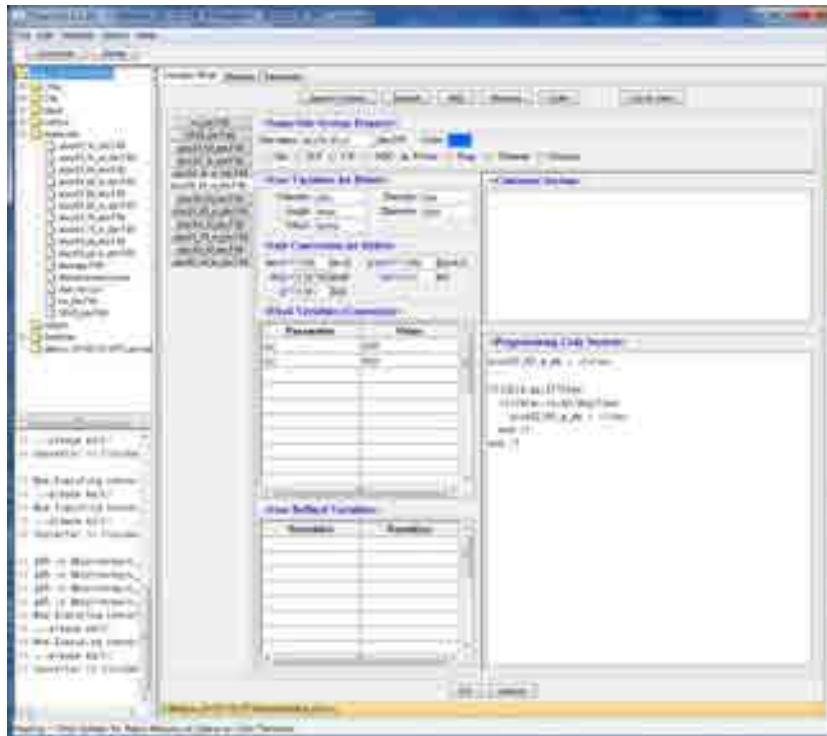

- Damage Probability
  - Users' Definition
  - Fortran 95 like

DB\_12\_01\_23\_MUSE

8

# Functions III

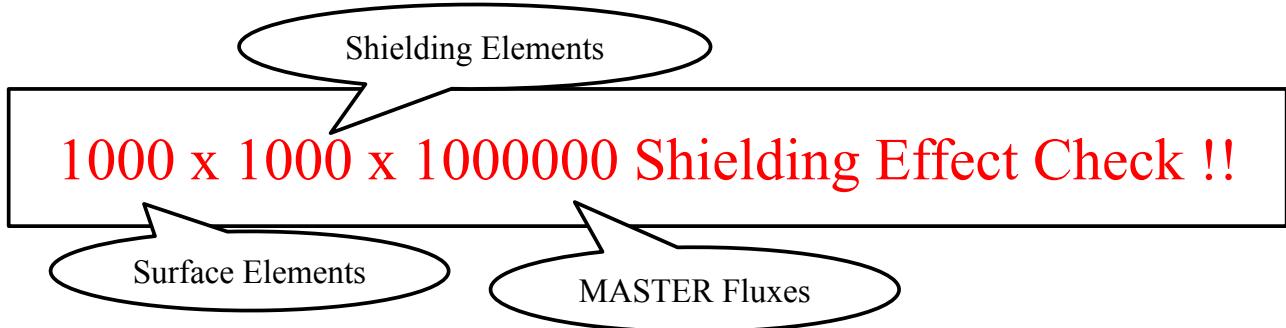

DB 12 01 23 MUSE

9

# Analytical Technic I

- Computation Cost
    - If an spacecraft has 1000 surface elements,

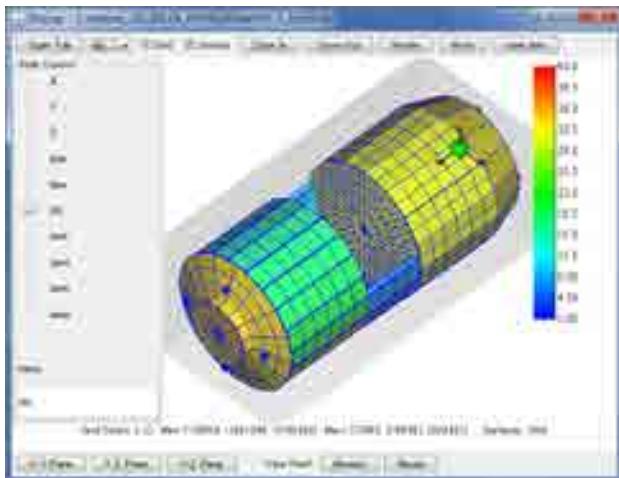

- Long computation time.
  - Huge memories to Windows PC.
  - HD is too slow.

DB 12 01 23 MUSE

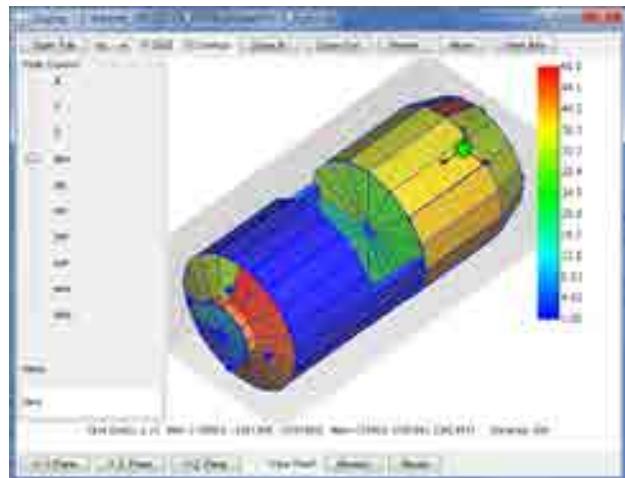

10

## Analytical Technic II

- Reduce Shielding Elements

Shielded Element

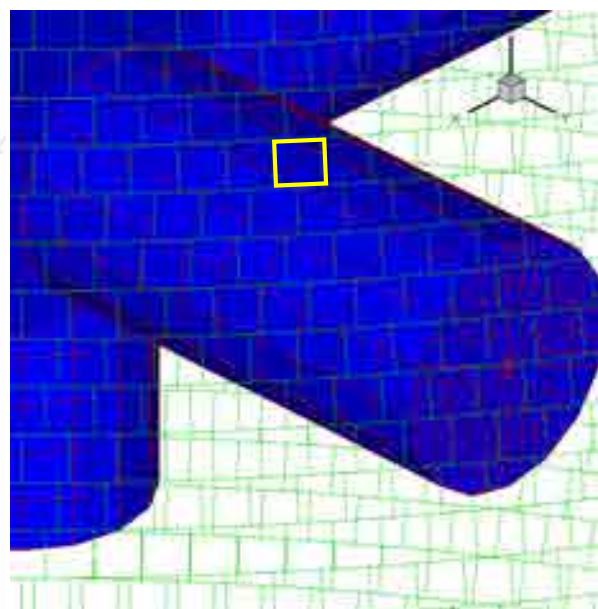

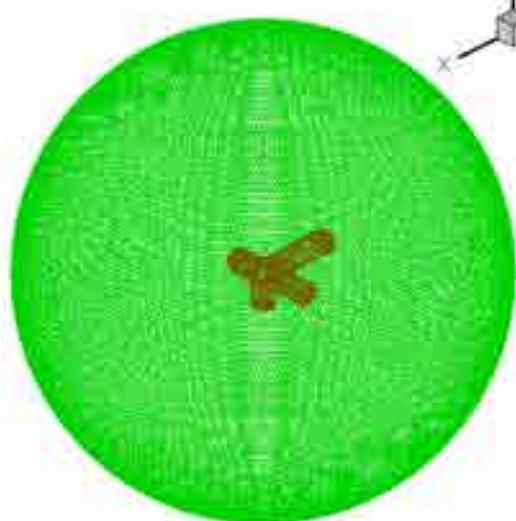

Shielding Element

DB\_12\_01\_23\_MUSE

11

## Analytical Technic III

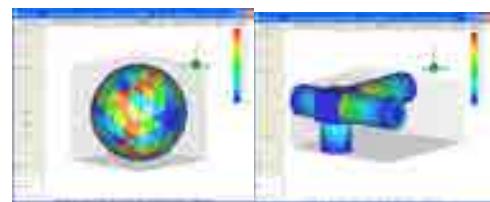

- Reduce MASTER fluxes into solid angle

DB\_12\_01\_23\_MUSE
